

Training material made FAIR *by-design*

Chapter 6. Considerations for FAIR video material

Exercise

Date:

Trainer:

Find a short video (for example on YouTube, Protocols.io, Zenodo, or another platform) that you might want to include in your own course, or use one of two sample videos that can be found [here](#) and [here](#). For your chosen video, take 5–10 minutes to assess:

- **Findable** → Is it hosted on a trusted platform? Does it have a DOI or persistent identifier?
- **Accessible** → Is the access type and language defined? Can the video or transcript be downloaded?
- **Interoperable** → Are there captions or transcripts? Is it in a standard format (e.g. .mp4, .mov)?
- **Reusable** → Is there a clear license? Are contributors and tools properly attributed? Is there versioning information?

Checklist for minimally FAIR video material		
	Action point	In place: yes/no/unclear?
Findable	Link the video and DOI record to each other	
	Use a trusted host (e.g. institutional repo, Zenodo, YouTube)	
	Add clear titles, descriptions & keywords for discoverability	
Accessible	Define access level (open, restricted, etc.) and language in metadata	
	Offer a downloadable copy where possible	
Interoperable	Include captions or transcripts (.srt, .txt) in the record	
	Use standard formats (.mp4, .mov, .webm)	
	Follow metadata standards (e.g. Dublin Core, schema.org)	
Reusable	Add a clear open license (e.g. CC-BY, CC-BY-SA)	
	Give proper attribution to creators and contributors	
	Tag AI-assisted content transparently	
	Document creation date, version, and context
